

The 9<sup>th</sup> International enviBUILD 2014 Conference held in Brno focuses on specific issues related to buildings and environment, especially in Central Europe. It should provide an opportunity for scientists and academics to publish and discuss recent findings concerning critical issues, technical aspects, progress and future directions in the field of building physics, sustainability and healthy built environment.

Using integrated building design we can find new ways for optimization of energy consumption and mitigation of environmental impacts of buildings, with respect to quality of indoor environment. One of the major factors contributing to this issue is also application of new advanced materials and technologies. Therefore we look forward for the results of research related to building materials, building envelope systems, design and evaluation of healthy, comfortable and economically effective indoor environment.

The conference is held under the auspices of Prof. Ing. Rostislav Drochytka, CSc, MBA, dean of the Faculty of Civil Engineering of Brno University of Technology.

# Invitation

to the 9<sup>th</sup> International Conference

**18<sup>th</sup> – 19<sup>th</sup> September 2014**  
**Brno, Czech Republic**

**[www.enviBUILD.eu](http://www.enviBUILD.eu)**

Conference language is English. All accepted papers will be published as enviBUILD 2014 Conference Proceedings in Advanced Materials Research journal indexed in SCOPUS database. Therefore all papers should be written in good English and should not exceed 4 pages (if more pages are required, please contact the organizers). All abstracts, papers in other languages and papers not accepted for publication in Advanced Materials Research will be published on a CD Proceedings with its own ISBN code.

### Conference Topics:

- Building Materials and Components
- Energy Performance of Buildings
- Retrofitting and Revitalization of Buildings
- Sustainable Building and Environmental Assessments
- Hygrothermal Performance of Buildings
- Indoor Climate, Thermal Comfort and Ventilation
- Daylighting and Insolation
- Acoustics and Noise Protection
